

EU20i

Max HP	2.5
Sound Level (DB)	52
Output (kw): Rated	1.6
Max	2.0
Output Voltage (V)	230
Continuous Operating Hours Without Refuelling at Rated Load	10.5
Dimensions (mm)	L: 510, W: 290, H: 425
Dry Weight (kg)	21
Fuel Type	Petrol
DC Output	12V, 8A
Current (A)	7
Frequency (Hz)	50
Tank Capacity (litres)	4.1

-  2000 watts max output
-  52dB(a) at 7m @ 1/4 load
-  21kg
-  10.5 hours @ 1/4 load
4 hours @ max load
-  Inverter technology
Stylish and ergonomic design
3 pin socket
12 volt DC output

Following on from the success of the EU10i, Honda have launched the new EU20i. It is designed to combine the unique elements that make the EU10i so popular, portability, low noise, clean and efficient power, with the benefit of a greater power output. The EU20i is ideal for a variety of outdoor recreational and home uses. Fitted with Honda's exclusive inverter technology, it offers unsurpassed power stability in a portable generator. Power is passed through a special microprocessor which "smoothes" the power output so computers and other sensitive electrical equipment can be run safely on this model. EU20i features EcoThrottle, this offers excellent fuel economy by incorporating a load-dependent speed control governor which automatically adjusts engine speed to the optimal level. The low noise design only produces 52db@ 7m, equivalent to the noise level in a typical business office. Parallel cables are available to allow the EU20i to be connected to other EU20i's to provide additional power.
